Profile

I am an advocate and a fan of modern, functional, yet stunning looking interface designs. I am a designer/developer hybrid so I can do both design and code. My HTML, CSS and JavaScript skills are on a solid level but I'm always trying to improve myself and learn new skills.

I'm currently learning Vue.js on my free time. I am also part of a few different projects as either a designer and/or programmer. My current employer is the largest bank in Finland where I work as a UX designer on their mobile app.

Experience

UX designer, OP-mobile (intern)

2018 -

OP-Palvelut

Tasks included user interface design, user experience design and assisting on user research for the mobile banking app of the Finnish bank Osuuspankki.

Other tasks include video editing and creating animations.

IT-support (intern)

2016 - 2018

Lapland University of Applied Sciences /
Student Union ROTKO

Tasks included IT-support for students, graphical design, content creation and website maintenance.

During the spring of 2018 my main task was the complete design and creation of the new homepage for the student union ROTKO.

Goldsmiths' assistant

2011 - 2014

Taigakoru

Tasks included fabrication of jewelry, cleaning, working as a salesperson/cashier and varying tasks helping goldsmiths.
